## The Three-year Regional Plan of Green Public Procurement 2022 – 2024

*GPP is a process whereby public authorities seek to procure goods, services and works with a reduced environmental impact throughout their life-cycle when compared to goods, services and works with the same primary function that would otherwise be procured*  
(Buying green! - A handbook on green public procurement  
3rd Edition- European Commission 2016)

In Italy GPP is mandatory under the Public Contracts Code  
(adopted in the 2016 and updated in the recent months)

→ the compliance is linked to  
CAM – minimum environmental criteria inclusion in public tenders  
that covers many categories of public purchases

## The Three-year Regional plan of Green Public Procurement 2022 – 2024 Link with sustainable development and circular economy

The main GPP sectors are identified on the basis of the MINIMUM ENVIRONMENTAL CRITERIA (CAM) published by the National Ministry of the Environment:

- Paper
  - Stationary
  - Toner
  - Printer
- Construction
- Food services
- Interior furnishing
- Street furniture
- Incontinence aids
- Cleaning services
- Cultural Events

- Textiles
- Energy services
- Footwear and leather accessories
- **Municipal waste**
  - Sanitation
  - Public green
  - Vehicules

## The Three-year Regional Plan of Green Public Procurement 2022 – 2024

The **Liguria Region** is a western region of Italy, engaged in GPP policies for a long time ( a pilot area in Enhance project) as always been active on the issue of Green Purchases:

➔ **2007** (GPP was still a voluntary instrument)

- policy that provided for the inclusion of environmental criteria in public tenders;

➔ **2016** (new Code of Public Contracts – obligation to Minimum Environmental Criteria)

- **first three-year regional GPP 2017-2019 Plan**

➔ **2021** (ONU Agenda 2030 in 2015, SSvRS in 2020) (actually in force)

- **new Three-year Regional GPP 2022-2024 Plan :**

**A BEST PRACTISE in Interreg Europe Portal**

## The Three-year Regional Plan of Green Public Procurement 2022 – 2024 Objectives & actions

### The Three-year Regional plan of Green Public Procurement 2022 – 2024 Link with sustainable development and circular economy

GREEN PUBLIC  
PROCUREMENT

CIRCULAR  
ECONOMY

SUSTAINABLE  
DEVELOPMENT

GPP generates a significant impact on production and consumption and looking at all stages of the life cycle of products and services, becomes a **monitoring indicator for the circular economy**.

In turn, the circular economy is central to **sustainable development**, combining economic, social, and environmental needs:

Liguria Region has drawn up its own new plan fully aware of this inter-connection, proposing **goals and actions which integrated with circular economy and sustainable development**.

The new GPP plan represents an **implementation tool of the Regional Sustainable Development Strategy**, and it is transversal to other programmatic and strategic documents such the **Climate Change Regional Strategy**.

## Regional Plan and Waste Management

the Regional GPP Plan is connected with  
the Regional Waste Management Plan (waste hierarchy)

THE COMMON GOALS ARE TO :

PREVENT WASTE

REDUCE WASTE PRODUCTION

ENHANCE RECOVERY AND RECYCLING

also through the creation of supply chains to the reuse of materials

→ TO SUPPORT SUSTAINABLE CONSUMPTION BEHAVIOUR  
OF THE CITIZENS
